Customer Reviews

Marketing a product is not that simple it needs effective strategy. As I notice the new trend of doing product marketing is thru the internet. You can have a website of your own or use the social media website. As for me I want to use the social media because there are over a million of users worldwide that can be a possible consumer of my product. So I search for a book that can possibly give me an idea about social media marketing and I am happy that I found this book. It contains information that helped me develop strategies in doing marketing. I learned from this book that it is better that you know your target customer and post advertisement to accurate social media. A lot of tips in doing marketing unto Facebook is also included in this book. The context of the book is explained in a simple manner that everyone can easily understand and follow. I recommend this book to those who wants to start doing a marketing advertisement thru Facebook.

I am actually new to using the internet and social media 'as' marketing techniques. I am in the very beginning stages of planning my own small business and from loads of sources (including books) I have found that the social media is THE most successful, efficient and affordable method for marketing. I checked out another book that detailed YouTube, intstagram, twitter and Facebook together as the best sources of social media. It said that based on a study, Facebook is a better source, not saying I should ignore others, but my attention should mostly focus on Facebook for marketing purposes. I actually got some more superb ideas for my planning here. One idea I really liked and agree with was the idea of reflecting reality as often as possible in my posts. I.e. being a part of charity events, parades and other such events makes the profile look good. Also include some humor, to make it more organic. Actually, it says here, that being organic is what builds the reputation of the business of Facebook. And I agree! What came as most useful for my purpose in purchasing this book were chapter 3 and 4; chapter 3 on the useful tools and features for Facebook marketing and chapter 4 on content marketing. The Big No Nos are equally helpful. It included some practical details I didnâ™t give much about.

The ways of effectively marketing your website and items for sale has changed over the years. Facebook is one of the leading means of getting your items sold in an affordable way. The book outlines how that can be accomplished. The information you will learn include how to build your

reputation, create a community of your own, increase the reach of your sales message, how to get Likes, things to avoid, how to promote your Facebook page, the proper way to do content marketing, the proper use of videos and links, and how to maximize Facebook niche communities. The strategies outlined will surely boost your marketing efforts. Read the book and increase your sales. I plan on adopting many of the things contained in the book so that I can get more sales.
