My daughter actually thinks this is a fun game. It is a great way to see what types of topics we may need to focus more on.

My 5 year old son likes the Brain Quest products. He seems to think we're playing a game and looks forward to each challenge the next page brings. I believe they have increased his

comprehension. I highly recommend them.

My almost five year old loves this. He's not reading at this level yet, but I read the stories to him and he can answer the questions, which is good practice for comprehension. Marking as 4 stars because I feel like the grade levels on most of the brain quest products are off. This is really more for kindergarteners.

I used this as part of the pre bedtime reading story. It is such a great way to motivate kids into reading. My daughter thought it's a game and she enjoys to "play" the game; learning so much while "playing" with the cards. The game allows two people to participate at the same time. I read the question and withholding the answer from her. Although slightly competitive, there is no scoring system for the game, making it more family-friendly and focused on learning. It comes with a hard cover sleeve and that's very convenient to carry on the go, learning anywhere; while in the car, flying, at the park...etc. The pages themselves are plastic like - coated hard paper so that they lasted for a long time while learning/playing.

I bought this product for my three year old who has already been enjoying other products by BrainQuest. We were happy with the delivery and condition. I would recommend this product for anyone with young kids. It is great for in the car, on the go, and at home because all of the cards are held together with a sturdy clip. Quick clean up, fun stories/questions and lots of learning taking place:)

Brain Quest is awesome! The questions & subject matter are very age appropriate. The layout is easy enough that my 6 year old can read the QnA herself. Highly recommend!

All of this series is excellent for parents/grandparents and small children to interact in an educational way.

Anyone who has younger children learning to read will enjoy these short stories. They are fast and easy to read, and the questions helped my children with their active listening skills.
