# Workbooks-Time, Money And Fractions Grades 1-2

## Synopsis

SCHOOL ZONE-Workbook. This book is packed full of different activities to help your child develop their skills while allowing them to have fun. This package contains one sixty-four page workbook. Available in a variety of different age groups and different themed activity books, each sold separately. Made in USA.

## Book Information

Paperback: 64 pages

Publisher: School Zone Publishing Company; Deluxe Workbook edition (October 29, 2003)

Language: English

ISBN-10: 1589473256

ISBN-13: 978-1589473256

Product Dimensions: 4.4 x 0.4 x 9.4 inches

Shipping Weight: 7.2 ounces (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (9 customer reviews)

Best Sellers Rank: #344,016 in Books (See Top 100 in Books) #59 in [Books > Children's Books > Growing Up & Facts of Life > Family Life > Money](#) #59 in [Books > Children's Books > Education & Reference > Math > Fractions](#)

Age Range: 6 and up

Grade Level: 1 and up

## Customer Reviews

The main reason I got this workbook for my son was the section on fractions. It begins by explaining the difference between equal and unequal parts, and then illustrates fractions by instructing the child to color certain sections for each shape. Fractions are shown with triangles, squares, circles, etc. There is no computations with the fractions -- just activities to teach kids to recognize what various fractions look like with different shapes. We put away the money pages for when he can count by fives because they actually have quite a mix of coins to add up. Remembering the monetary values, adding double digits, and working with various coins was just too much at this point in time...we want to keep learning fun, not stressful. We will use the exercises eventually. The time section was the only part that I had an issue with. Granted this workbook is suppose to be for grades 1-2, but I would recommend this workbook for kindergarten level if not for the activities requiring the time to be written out as "six o'clock" or "half past eleven." My son is still learning to read & write, but he knows how to draw the hands on a clock in the correct positions, and how to write time in digital

form (ex: 3:30), so having to try and remember the words was a bit discouraging. Since he does very well telling time with both kinds of clocks on his own, I told him what to write for the fill-in-the-blanks. Eventually, we will move on to Addition and Subtraction 1-2: I Know It! by School Zone. I usually use School Zone to review what my son has learned in his Kumon and Spectrum workbooks.

I bought this at our local store and really like it. I'm using this at home with my 5 year old since their kindergarten class is moving a lot slower than expected. I'm using this along with the addition & subtraction book. We've only covered the first section of this book but working with both, it has helped my daughter relate math with everyday life when dealing with money. I would recommend using this along with a general math workbook instead of it on its own.

Great supplement which really helped our little one to grasp the concept of the material. A wonderful aide in mathematics.

my son really likes this workbook, i have never used any other books so i cant compare. good for the money

Good practice workbook for review in summer.
