An Easy-to-Understand Guide For Defeating Darwinism By Opening Minds

Synopsis

Voted one of Christianity Today's 1998 Books of the Year! For decades, Christians have felt voiceless in the critical debate over evolution. Until now. Finally, ordinary Christians have the opportunity and the resources to defeat the false claims of Darwinism. With all of the complicated scientific debate swirling around the topic of evolution, Christians need an easy way to understand the basic issues without oversimplifying. Phillip Johnson has the answer: the key to defeating the false claims of Darwinism is to open our minds to good thinking habits. Here is first-rate advice on avoiding common mistakes in discussions about evolution, understanding the legacy of the Scopes trial, spotting deceptive arguments, and grasping the basic scientific issues without getting bogged down in unnecessary details. In the bestselling and critically acclaimed *Darwin on Trial and Reason in the Balance*, Phillip Johnson took on the academic elites and exposed the misleading claims of evolutionary naturalism. *Defeating Darwinism by Opening Minds* provides a new and powerful treatment of these issues for high-school students, parents, teachers, pastors, youth advisors and ordinary readers. Johnson aims not just to defeat a bad theory, but to defeat it in the right way-by opening minds to the truth.

Book Information

Paperback: 131 pages

Publisher: InterVarsity Press (August 7, 1997)

Language: English

ISBN-10: 0830813608

ISBN-13: 978-0830813605

Product Dimensions: 5.5 x 0.4 x 8.2 inches

Shipping Weight: 4.8 ounces (View shipping rates and policies)

Average Customer Review: 3.1 out of 5 stars [See all reviews](#) (141 customer reviews)

Best Sellers Rank: #70,816 in Books (See Top 100 in Books) #23 in [Books > Christian Books & Bibles > Theology > Creationism](#) #33 in [Books > Science & Math > Evolution > Organic](#) #104 in [Books > Religion & Spirituality > Religious Studies > Science & Religion](#)

Customer Reviews

As a defender of creation science, Phillip Johnson is a breath of fresh air. Nowhere are there indefensible scientific arguments for a young earth, or a worldwide flood that accounts for the fossil record, or any of the other endlessly recycled Henry Morris/Duane Gish nonsense that makes up so much of the creationist "young earth" camp. Johnson frames the question more on a philosophical

level, pitting the presuppositions of both camps against one another (materialistic naturalism vs. theistic supernaturalism), and attempting to show that adherents of the first camp make just as many untestable and unsupportable assumptions as the adherents of the second. Johnson is a talented writer, and presents a positive argument for "opening" the debate by forcing the evolutionists to relax their dogmatic hold on the thinking in academia, and allow for a more open and free discussion of the actual issues, including evidence for supernatural intervention in the creation and evolution of life. Unfortunately, the only positive evidence Johnson suggests is Michael Behe's irreducible complexity argument, which is just a repackaged intelligent design model, and the conventional attack on biology's admitted problem with the incompleteness of the fossil record. Throughout the book, Johnson emphasizes the dominance of the materialistic philosophy that pervades every aspect of modern public education and academia. This predisposition, he argues, hopelessly biases any approach to scientific facts and prevents scientists from appreciating the fuller truth that's out there if only they would open their eyes (minds). Johnson repeatedly mischaracterizes the practice of science and the state of affairs in biological circles.
