# Preschool Scholar

## Synopsis

Sharpen preschool skills by engaging your child's natural love of learning! This Preschool Scholar workbook introduces a lively selection of reading readiness, early math, and beginning science skills. It also uses a farm theme, simple directions, and colorful activities to motivate your child to complete each activity and turn the page to try the next one. Your preschooler will explore beginning sounds, counting, colors, shapes, and classifying. Simple but creative Try It! ideas extend the lessons, for example, sending little learners on an alphabet hunt. Plus, the riddles in Farm Funnies add to the energy. The slim, 32-page size is just right for tucking into totes and luggage.

## Book Information

Paperback: 32 pages

Publisher: School Zone Pub; Workbook edition (July 7, 2015)

Language: English

ISBN-10: 1589474546

ISBN-13: 978-1589474543

Product Dimensions: 0.2 x 8.5 x 10.8 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (29 customer reviews)

Age Range: 4 and up

Grade Level: Preschool and up

## Customer Reviews

My daughter is 3 years and almost 3 months old and loves this workbook! She finished the entire book in less than 5 days, which I honestly did not expect, given that I was planning to work 1/2 hr on this per day. Like all toddlers, her attention span is short and so, I wanted it to be quick, fun and educational and move along to other activities like, painting, play dough, etc... Miraculously, she enjoys this so much that she keeps asking for more and I was the one who had to stop her one day, when we were going over 1 hour! Either way, the point of the matter is, it's really visually brilliant, teaches basic skills, holds your toddler's attention span (she's going to preschool in the fall) and I wanted her to be ready to focus on each activity for some time, as opposed to being all over the place. This really helps and she looks forward to it all the time! I have bought most of the 4-6year

old series from school zone. I will update more when we've completed those books.p/s: I bought another version prior to this and she hated it and refused to even open the book! This says alot! :)

Wonderful for summertime when it in school. Our toddler 2 1/2 yr. old loves this. You get to spend quality time working the pages with your child. Some of it is too advanced but skip over that and just try what interests a child.

Great preschool workbook for ages 4-5. I like that the pages are in full color with great fun graphics and easy to follow designs. My 4 yr old twins love these. Wish they had more pages but I'm happy to just order more books and have them do each book over again!

I am learning the ins and out of homeschool with my 3 year old and am using this book as part of our curriculum. I felt the price was more than fair for the material that comes in this book. He really enjoys "playing school" and looks forward to us working together in this book. While some of the lessons are a bit advanced for him, I can totally see him mastering them within the next year or so.

These books are great for incentives, prizes etc. Or for an easy book to get through. Great for the price and for my purpose. Not good if you plan to use long term or keep your child busy. Too short of a book.

I bought this to go over the basics with my daughter before she started kindergarten and it's a great little book. It covers a lot of the main introductory topics, pages are bright and engaging, and she loved doing it. I wouldn't use this alone, but in addition to other books, it's a great option for preschoolers. I always introduce the following grade level to my children as well, so this works great with kindergarten books too. It's also a nice sized book for the price, I'd recommend it.

My nephew liked this a lot.

My 3 year old granddaughter finished the entire book in just a few days. The book was visually attractive, with basic skills, held her attention. Nice little book for the price.
